

BOOK CLUB READING CHALLENGE & DISCUSSION PORTAL

Use-Case Flow Specification

Use Case ID: UC-06
Use Case Name: Vote for Next Book
Primary Actor: Club Member

Preconditions

1. The Club Member is registered and logged into the system.
2. A monthly book-selection poll is active.
3. The active poll contains available book options.
4. The Club Member has access to the active poll.

Postconditions

1. The Club Member's vote is recorded successfully.
2. The poll tally is updated.
3. The Club Member cannot cast another vote in the same monthly poll.
4. The updated poll result is displayed.

Main Success Scenario

1. Club Member opens the active monthly book-selection poll.
2. System displays the available book choices.
3. Club Member selects a book.
4. System validates the Club Member's voting session.
5. System verifies that the Club Member has not already voted.
6. Club Member submits the selected book.
7. System records the vote.
8. System updates the poll tally.
9. System displays a vote confirmation to the Club Member.
10. Use case ends successfully.

Alternate Flow — Duplicate Vote

1. At Step 5, the system detects that the Club Member has already voted in the active monthly poll.
2. The system rejects the new vote.
3. The system displays a message informing the Club Member that a vote has already been recorded.
4. The existing vote remains unchanged.
5. Use case ends without recording another vote.
